DETAILED ACTION

Claims

1. Claims 1-16 are pending.

Ex parte Quayle Action

2. This application is in condition for allowance except for the following formal matters:

A. There is no priority statement in the first sentence of the specification.

If applicant desires priority under 35 U.S.C. 119 based upon a previously filed application, specific reference to the earlier filed application must be made in the instant application. This should appear as the first sentence of the specification following the title, preferably as a separate paragraph unless it appears in an application data sheet.

Please insert a priority statement in the specification.

B. Claims 1-16 are objected to for containing parenthetical references.

Various claims contain parenthetical references, including numbers shown in one or more drawings. Such parenthetical references can be helpful during prosecution, but are not usually included in U.S. patent claims.

Please delete all parenthetical references from the claims.

3. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

4. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Art Unit: 1772

Potentially Allowable Subject Matter

5. The claims are allowable in view of the persuasive arguments presented in the request for reconsideration submitted on 10 November 2003 (Paper No. 30).

A more detailed statement of reasons for allowance will be provided with the letter of allowability, if any.

Citation as of Interest

6. Kitahara et al (US 6,538,084) teaches, at col. 1, lines 57-61, that the surface of a substrate to be adhered to a fluororesin material may be roughened by sand blasting.
